ROHIT RAJ

Software Engineer

8797311132 rajrohit9377@gmail.com LinkedIn Bengaluru, India

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in building scalable applications and AI-driven solutions across backend, full-stack, and data engineering. Possesses a strong foundation in software engineering, developing production-oriented systems and solving complex technical problems.

WORK EXPERIENCE

HashedIn by Deloitte | Internship
Software Engineer Intern
Apr 2026 - Aug 2026
On-site • Bengaluru, Karnataka

- Completed a 16-week product engineering program covering **Java**, **Spring Boot**, **Angular**, **Python**, **Generative AI**, **Agentic AI**, and **Data Engineering**.
- Developed an **Agentic Repository Profiler** to automatically analyze repositories, extract workflows, identify security findings, and generate structured profiles.
- Designed a hybrid analysis framework combining **Tree-sitter parsing** with two specialized Deep Agents, analyzing repositories with **250+** files.
- Reduced repository profiling latency by **50%** through deterministic parsing and parallelized agent-based analysis.

Technologies / Skills Used : *Java, Spring, Python, Agentic AI, Data Engineering, Angular*

PROJECTS

AI Agent Factory | Github

- Developed an **AI Agent Factory** that transforms **3 document types** (BRD, PRD, TRD) into production-ready code using LangGraph, RAG, and LLM planning.
- Built a **5+ stage pipeline** for document ingestion, ChromaDB vector search, design-pattern selection, project planning, and sequential code generation.
- Integrated **REST APIs, SSE, and WebSockets** to support human-in-the-loop approvals throughout the automated code-generation workflow.
- Implemented the backend with **FastAPI, SQLite, and LangGraph**, adding structured LLM outputs and observability for cost and token tracking.

Technologies / Tools Used : *FastAPI, LangGraph, OpenAI*

Smartwatch Leaderboard & Gamification Platform | Github

- Developed a full-stack fitness platform enabling users to participate in challenges, track **real-time rankings**, and earn achievement badges.
- Built responsive web applications using **5+ Angular technologies** including Angular, RxJS, NgRx, JWT Authentication, and role-based access control.
- Developed **15+ Spring Boot REST APIs** with MySQL, JPA/Hibernate, Apache Kafka, and Spring Batch for activity processing, leaderboard management, and automated reward assignment.

Technologies / Tools Used : *Angular, Spring Boot, Kafka*

SKILLS

Programming Languages :	Python, Java, SQL, C, C++, JavaScript
AI & Machine Learning :	LangChain, LangGraph, Rag Pipelines, Agentic AI, NLP, LLM Applications
Development :	Spring Boot, Fast API, Angular, HTML/CSS
Databases :	MySQL, MongoDB, SQLite, ChromaDB
Data Engineering :	Apache Spark, PySpark, numPy, Pandas
Software Engineering :	Data Structures & Algorithms, DBMS, Operating System, Computer Networks, OOP
Tools & Platforms :	Kafka, Docker, Git/GitHub, Postman, Databricks

EDUCATION

The National Institute of Engineering | Mysuru, Karnataka
Bachelor of Engineering in Information Science and Engineering
Nov 2022 - Jun 2026
CGPA : 8.7/10

Vidya Niketan | Patna, Bihar
Senior Secondary School (12th)
May 2019 - Apr 2021
Score : 81%
